St. Mary's River
Watershed
STRATEGIC PLAN 2012-2016

In late 2006, the Board of Directors of the St. Mary's River Watershed Association (SMRWA) adopted its first strategic plan for the five-year period 2006 to 2010. That plan was prepared during a careful process guided by several experienced consultants. This first plan included adoption of a mission statement, strategic priorities, and an action plan to implement those priorities, along with objectives and milestones for each priority and an analysis of the Association’s Strengths, Weaknesses, Opportunities, and Threats.

Having used this first strategic plan to guide SMRWA’s activities and to think more strategically over the past five years, the Board then appointed a new Strategic Planning Committee to prepare the second plan for the next five-year period. This second plan will also coincide with the period covered by the new Comprehensive Plan for St. Mary’s County, which is especially important for the Association to meet its own goals because the watershed of the St. Mary’s River lies entirely within the County.

During its deliberations, the Committee has reviewed the first plan with the goal of refining and adjusting its priorities, objectives and milestones so SMRWA will be well positioned to address the Watershed’s most urgent needs, build on its past successes and accomplish its updated objectives. Once this second plan is adopted by the Board, the committee and the Board intend to review it periodically during the next five years and to continue to assess the evolution of the Association. In that way, the Board hopes to ensure progress toward achieving our mission and increasing our ability to address our priorities.

MISSION STATEMENT

To protect, improve, and promote the sustainability of the St. Mary’s River Watershed through the collaborative efforts of economic, academic, environmental, agricultural, historical, social, cultural, and political stakeholders in the community.

While the mission of SMRWA reflects the understanding that our work may never reach our ultimate goal of total sustainability within the entire watershed, there are certain milestones that need to be targeted and acknowledged. Shellfish harvest designations as a result of bacteria pollution should provide the most immediate indicator of progress. In 2011, both conditional waters and restricted waters in the St. Mary’s River declined in acreage. Further reduction of these areas would indicate significant progress and an interim milestone. Elimination of any shellfish harvest conditions or restrictions would indicate a major milestone. Another rating commonly used as an indicator of waterway health is “fishable and swimmable.” This milestone coincides with the elimination of shellfish harvest restrictions since shellfish are the most impacted by bacteria-laden waters. The ultimate milestone is achieving sufficient waterway health to successfully petition the state and EPA for removal from the impaired waters list, as sanctioned under the Clean Water Act section 303 (d). Inevitably there remains a threat that the waterways’ health will erode due to new and well as currently recognized pressures and threats. Therefore our work is ongoing for the foreseeable future.
**STRATEGIC PRIORITIES**

**Promote sustainable practices within the watershed by all the affected stakeholders in order to achieve a vibrant and healthy river system.**

- Promote implementation of Watershed Action Strategy
- Influence public policy
- Affect behavior
- Strengthen connections, expand relationships, and form alliances
- Maintain a resources toolbox

**Strengthen the St. Mary's River Watershed Association's organizational capacity to protect the sustainability of the Watershed and thus achieve its mission.**

- Refine best business practices
- Expand and retain membership
- Enhance fundraising programs
- Refine and add new relationships with foundation and corporate grantees

**BACKGROUND**

The Watershed for the St. Mary's River encompasses 47,000 acres of land and waterways, which lie entirely within St. Mary's County. Much of the watershed is covered by the Lexington Park development district, one of the three major planned high density growth areas in southern Maryland. As a result, development pressures are a significant concern because the River’s tributaries and lands within its watershed are subject to increasingly negative impacts and degradation of environmental quality.

Because St. Mary's County is host to the entire watershed of the River and no other jurisdiction has a role in its care, the government officials, residents and businesses in the County must take responsibility for the future sustainability and protection of the River and its watershed.

St. Mary’s County is the fastest growing jurisdiction in Maryland and is expected to add 18,100 new residents by 2020. Currently (2012) the county’s population is 112,000 and about one third reside within the St. Mary’s River watershed. Under county policy regarding residential growth, 70% of new homes will be built in the St. Mary’s River watershed, We can anticipate 8,700 new homes by 2016—an increase of 24% in just five years.
AN ACTION PLAN WITH OBJECTIVES AND MILESTONES

Promote sustainable practices within the watershed by all the affected stakeholders in order to achieve a vibrant and healthy river system.

At the core of the SMRWA’s identity is its commitment to protect, improve, and promote the sustainability of all the communities and natural resources within the entire watershed for the St. Mary’s River. As our mission states, we achieve this goal through the collaborative efforts of the River’s many stakeholders. We believe that we can only achieve this important goal through a balanced, whole-systems approach that will promote the watershed’s well-being by incorporating the many economic, academic, environmental, agricultural, historical, social, cultural, and political assets of the region.

As a result, the sustainability of the watershed is the highest priority for our strategic plan. The following four critical tactics were adopted in the first plan, and they will continue to be the SMRWA’s most important activities for achieving our core mission during the next five years. They will also be crucial for determining our effectiveness in communicating our goals and gaining increased support from prospective members, government officials, and the public in general.

§ Promote implementation of Watershed Action Strategy & Implementation Plan

The restoration program for the Chesapeake Bay is undergoing a makeover dictated by the Court in *Chesapeake Bay Foundation et al vs. US EPA* [June 2009], which found that the EPA had failed to enforce the Clean Water Act and needed to make significant changes in how to achieve compliance in the waters of the Chesapeake Bay. The critical language in this case is “assure that management plans are developed and implementation is begun” by 2025. The subsequent action taken by the EPA was to assign a pollution diet, known as the TMDL (Total Maximum Daily Load), to each state and watershed basin. It is the states’ and local governments’ requirement to develop, submit, and gain approval for action strategies, called WIPs (Watershed Implementation Plans), that are likely to achieve compliance with the Clean Water Act. Collectively, the localities, states, and federal agencies must implement the WIPs and achieve predetermined two-year milestones. To avoid a situation where responsibilities are shifted to the backend, 2025, EPA had mandated that each jurisdiction achieve a 70% compliance to the TMDL by 2017.

Objectives with Assessment Metrics

1. Actively participate in the EPA-mandated WIP process for St. Mary’s County with special emphasis on the St. Mary’s River watershed.
   - 2011-2016 SMRWA representation on the county WIP committee actively participates and provides necessary background and science, collaboration of identity and problem solving, and partnership to launch implementation.
   - Local, state, and federal adoption of plan
2. Complete the Characterization document and Watershed Restoration Action Strategy – EPA “a through i” watershed plan
   - Local, state, and federal adoption of plan

Critical Input Milestones

1. 2012 - Public process for Characterization draft and EPA “a through i” plans
2. 2013 - Finalize documents and submit to EPA and state for approval
3. 2015 - Implementation rate meets or exceeds two-year milestones (and 2017)
Influence Public Policy

SMRWA recognizes it must continue to play an essential role by influencing public policies with potential impacts on the watershed through effective interaction and collaboration with government. During the next five years, improvement in the government's approach to land use, management and development—as well as habitat restoration—will continue to need SMRWA’s advocacy for new and better use of science to craft regulations, on-going and effective oversight and compliance enforcement, use of substantial penalties for noncompliance, effective requirements to redress and mitigate environmental damage and, in general, the will to make the watershed more sustainable.

Objectives with Assessment Metrics

1. **Maintain and augment the respect** for SMRWA by county, state, and federal agencies and staff, and from our St. Mary's County Commissioners and our representatives at the state and federal governments.
   - 2012-2016 focus attention on the reliability and credibility of information that SMRWA submits by providing informed, visionary alternatives based on sound science.
   - 2012-2016 continue to request a position at the table during policy-making sessions of local officials; 2012 increase from one to two members of the Board serving on government advisory boards; 2012-2016 foster a relationship whereby government staff actively seek SMRWA’s input on a routine basis for policy development and decision making.

2. **Continue to develop our ongoing formal relationships** with county, state, and federal agencies and staff through the effective assessment of local public policy making, always looking for opportunities to turn negatives into positives.
   - Increase the number of informal interactions with government through constructive analytical and advocacy-oriented papers and meetings. 2012-2016 maintain a program for quarterly interactions with government.
   - Deliver a State of the St. Mary's River Watershed address to the county commissioners and appropriate staff in a televised session. 2012-2016 continue issuing an annual report on conditions in the watershed, including metrics and milestones on land use, water quality, and progress achieving our vision; 2012-2016 start to issue a mid-year "update" reporting our specific concerns and latest scientific findings about conditions in the watershed.
   - 2012-2016 continue to take advantage as opportunities arise to formally address policies and regulations (such as policy revisions and zoning amendments) through one-on-one meetings with county and state staff, participation in public meetings, letter writing and submitting written testimony based on sound science and accurate data about conditions in the watershed.

3. **Seek Scenic River status** for the St. Mary’s River in collaboration with Historic St. Mary’s City and St. Mary’s College of Maryland.

Critical Input Milestones

1. One member of the Board or staff serving on the county WIP committee.
2. Increase from one to two members of the Board serving on government advisory boards.
   - Beginning: 01/2012  Completion: 07/2013
3. Increase the number of informal interactions with government from two times per year to a minimum of three times per year.
   - Beginning: 01/2012  Completion: 12/2012
4. Deliver a State of the St. Mary's River Watershed address every two years.
   - Beginning: 09/2012  Completion: Every two years
5. Deliver a midyear "update" report.
   - Beginning: 01/2009  Completion: 01/2010
6. Provide formal response to policies and regulations at all relevant formal public sessions.
   - Beginning: 06/2006  Completion: Ongoing
7. Research, draft application, and advocate for Scenic River status for the St. Mary’s River.
   - Beginning: 06/2014  Completion: 12/2016
8. Publish an annual report.
§ Affect Behavior

Educating and motivating the public is vital to developing support for our mission. Helping developers make informed decisions to minimize the impact of development on the watershed is also essential. Equally important is the need for individual residents, homeowners and area workers to recognize the impacts of their activities on the watershed and how they might improve their behavior to protect the watershed’s natural resources and promote the sustainability of its communities.

Objectives with Assessment Metrics

1. **Enlighten the public** through a variety of hands-on implementation projects and via campaigns and events with two objectives in mind: to educate and to motivate the public to take action within themselves and their immediate environment.
   - Continue holding an annual celebration of the St. Mary's River and its watershed that attracts the general public through conservation-oriented entertainment, water-based activities, and informative exhibits by accommodating large, diverse crowds and by fostering direct interaction with the River and the environment of it watershed.
   - 2012-2016 provide the public with an annual seminar or symposium that informs and motivates conservation on sustainability.
   - Utilize our own publications and letters to the editor in other publications to maximize the extent of our outreach and publicity to the public.

2. **Continue seeking opportunities to partner with and change the practices of land development businesses**
   - Provide economic analysis of alternative conservation methodologies such as rain gardens, forested buffers, permeable pavements, and combining low-impact parkland with the preservation of sensitive areas to be impacted by development.
   - Establish formal interaction with Chaney Enterprises (or other) in the planning and development of the 385-acre Stewart's Grant planned urban development. Create a model of this program for others to replicate.

Critical Input Milestones

1. Hold an annual celebration of the river and its watershed (RiverFest).
   - Beginning: 01/2012  Completion: Annual

2. Provide the public with a series of ongoing seminars and workshops. At least four per year should be a hands-on approach such as rain garden installation, rain barrel setup, shoreline restoration, habitat restoration, or reforesting watercourse buffers.
   - Beginning: 04/2012  Completion: Annual

3. Require each Board member to write at least one letter to the editor per year.
   - Beginning: 04/2012  Completion: Annual

4. Provide land use industry professionals with an economic analysis of alternative conservation methodologies.
   - Beginning: 06/2013  Completion: 12/2014

5. Establish formal interaction with Chaney Enterprises (or other) for the collaborative planning of sustainable communities.
   - Beginning: 06/2014  Completion: Ongoing

6. Provide State Highways with locations and advocate installation of sign noting watershed boundaries.
   - Beginning: 04/2012  Completion: 06/2012
§ Strengthen Connections, Expand Relationships, and Form Alliances

Building strong bonds with other entities that share similar goals is an effective means of fostering sustainable conservation practices. Parties benefit by sharing both information and experience, by collaborating on programs, and building momentum and support. To pursue this tactic, however, it is important for SMRWA to identify appropriate groups that can support us in promoting sustainability and achieving our mission.

While SMRWA has now established connections with other watershed and conservation groups, we need to continue identifying other entities that can become involved in helping to influence public behavior.

Objectives with Assessment Metrics

1. Foster additional partnerships with conservation and watershed groups.
   - Strengthen existing relationships with Potomac Riverkeeper, Patuxent Riverkeeper, Potomac River Association, Patuxent Tidewater Land Trust, St. Mary's College of Maryland, St. Mary's River Project Education Team, Historic St. Mary's City, and Chesapeake Bay Field Lab.
   - Maintain working relationships with effective coalitions including Choose Clean Water, Maryland Stormwater Network, Chesapeake Bay Funders Network, and Citizen Shale.
   - Identify and develop effective relationships with additional groups such as NEMO (Non-point Education for Municipal Officials), St. Mary's County Commission on the Environment, Maryland Agricultural Land Preservation Board, Rural Legacy Board, and other nearby watershed associations.

2. Expand relationships to include stakeholders who are not currently focused on conservation.
   - In late 2013, actively pursue a relationship with the on site environmentalist for the Patuxent River Naval Air Station. (especially for the St. Inigoes site)
   - Foster expanded interactions between the business community associations such as the Chamber of Commerce, Patuxent Partnership, and Southern Maryland Navy Alliance.
   - Identify opportunities to partner and collaborate with St. Mary's County Public Schools, private schools within the watershed, and College of Southern Maryland.
   - Starting in 2014, seek partnerships and identify liaisons in areas where our whole systems approach is compromised by the lack of representation in their area of expertise such as St. Mary's County Historical Society, Minority Business Alliance, Master Gardeners, St. Mary's County Gardening Club, Watermen's Association, St. Mary's River Yacht Club and the environmental programs in area schools.
   - In 2015, engage the faith-based communities, especially those situated within the St. Mary's River watershed.

Critical Input Milestones

1. Maintain existing relationships with conservation and watershed groups.
   Beginning: 01/2012  Completion: Ongoing

2. Identify and develop at least one new relationship with a conservation or watershed group each year.
   Beginning: 01/2012  Completion: Ongoing

3. Expand relationship with the Patuxent River Naval Air Station and identify areas of mutual interests. In areas of mutual interest, plan an effective program to enhance and protect the river system. Seek ways to change behavior on those remaining areas of conflicting opinion.
   Beginning: 09/2013  Completion: 01/2014 (contact and identify interests)
   Beginning: 01/2014  Completion: 01/2015 (plan adopted by the Navy)
   Beginning: 01/2015  Completion: 12/2016 (seek further change)

4. Deliver the State of the St. Mary's River Watershed address to county commissioners and in public forums or at business partner meetings at least once every two years.
   Beginning: 09/2013  Completion: Ongoing
5. Identify one school and/or group each year that will broaden our whole systems approach
   and develop a working relationship with that group.
   Beginning: 01/2013  Completion: 12/2016 (adding three total)

6. Identify specific points of contact and include area civic groups, business partnerships,
   and faith based institutions on the mailing list.
   Beginning: 01/2012  Completion: Ongoing

7. Develop one alliance with faith based institutions each year.
   Beginning: 01/2013  Completion: Annual

§ Maintain a Resources Toolbox

SMRWA has succeeded in making a concerted effort to provide developers, businesspersons, homeowners,
and renters with alternative behavior opportunities, which foster conservation and sustainable living principles
and actions. Printed materials as well as a resource section on SMWRA's web site have been a valuable way to
reach our members, other supporters and the public and has made our information and resources more
accessible and relevant for local issues and individual interests.

Objectives with Assessment Metrics

1. Provide homeowners and renters with essential information about their watershed and necessary
   conservation techniques necessary to insure the continued health of the river system.
   • Continue to distribute the 40-page homeowner's guide to backyard conservation.
   • In 2012-2016, continue expanding the resource section of our web site with a section specific
to residential needs and another to foster sustainable neighborhoods through a rewards
   program.

2. Pursue ongoing scientific analysis of native oyster restoration.
   • Spring of 2012 through 2016, accumulate scientific knowledge on oyster restoration
     techniques and feasibility of implementation of restoration projects.
   • In 2012-13, editing existing footage in order to make a documentary of the Marylanders Grow
     Oysters in the St. Mary’s River.
   • Gain knowledge of aquaculture and partner with watermen in order to establish successful
     operations.

3. Collaborate with the land development industry by providing them with essential information
   about the watershed and necessary planning and implementation techniques that foster sustainable
   development principles.
   • Actively provide land developers with watershed plans to include information on how to
     apply the methods cited to other subwatersheds, updated metrics on water quality and trends,
     and new research and development in storm water control management.

Critical Input Milestones

1. Continue to distribute 40-page homeowner's guide to backyard conservation.
   Beginning: 01/2012  Completion: 12/2016

2. Add to the web site a section specific to backyard conservation tools.
   Beginning: 09/2013  Completion: 09/2014

3. Report on and promote on the oyster restoration program.
   Beginning: 01/2012  Completion: Ongoing

4. Edit and publish the film documentary of the Marylanders Grow Oysters in the St. Mary’s River.
   Beginning: 06/2012  Completion: 12/2013

5. Publish a short film of a sustainable development project and/or neighborhood rewards program.
   Beginning: unknown timeline—could as early as fall of 2014
Strengthen the St. Mary's River Watershed Association's organizational capacity to protect the sustainability of the watershed and thus achieve its mission.

SMRWA is committed to meeting the challenge of making the watershed more sustainable by working to meet our own long-term needs for staffing, equipment, technology, and financial resource that will enable the Association to sustain its mission.

Under its first strategic plan, SMRWA has been able to establish proven business practices and has responded effectively to a variety of needs both planned and unforeseen although it might have been able to do more if its resources had been greater. During the next five years, individual donations, including membership dues, and corporate donations will continue to serve as the core source of the financial support, but a successful fundraising campaign targeting foundations and corporate grants will still be needed to provide increased stability for the Association’s overall budgetary needs.

§ Refine Best Business Practices

Adoption of recognized best business practices has enhanced SMRWA's structural and functional capacity and will continue to do so for the next five years. The use of time-tested techniques for the organizational structure, personnel management, financial solvency, and infrastructure development of non-profit entities have been, and will continue to be, fundamental to the Association’s success.

Objectives with Assessment Metrics

1. Design and implement fundamental organizational policies and plans that will complement and augment SMRWA's Articles of Incorporation, Bylaws, and Mission Statement.
   - In early 2012, adopt a strategic plan update with requirements for periodic reviews and rewrites.
   - In early 2013, review SMRWA's hierarchical structure, standing committee structure, and assignment of responsibilities. Incorporate changes to these structures and hierarchy into the objectives and assessment metrics of the strategic plan.
   - In early 2013, revise the fundraising plan so that it clearly meets the needs of the annual budget. Identify opportunities to apply for funds two and three years in advance.

2. Expand the knowledge base and resources of the Board of Directors and staff through training and recruitment.
   - Starting in 2012, recruit at least one Board member each year with the expansion of knowledge and resources as the main objective. Areas of weakness identified include fundraising skills, connectivity to key groups such as the land development industry, and ethnic diversity.
   - In 2012, identify appropriate Board members and provide support for training in areas where the Board has weaknesses.
   - Urge Board members and staff members to attend regional and national watershed association conventions in order to maximize networking opportunities and take advantage of unique training seminars.

3. Expand the staff positions with titles and job descriptions, and increase staffing commitments.
   - By the middle of 2012, re-institute an Program Director position and increase weekly commitment to half time.
   - In order to allow the Executive Director to spend more time in the field and on fundraising obligations, in 2012 add a second part-time staff position, to assist with clerical duties and event planning.
   - Institute a policy to reimburse valued staff for 80% of cost for individual health insurance, or a percentage commensurate with their level of commitment. (i.e. half time worker might receive 50% of cost)

4. Seek complimentary or reduced-fee office space within the watershed and set up a SMRWA's permanent headquarters.
Critical Input Milestones

1. Adopt a revised strategic plan with requirements for periodic reviews and rewrites.
   Beginning: 04/2012  Completion: 06/2012
2. Annually review and modify as necessary the strategic plan.
   Beginning: 2013  Completion: Annually
3. Undertake a comprehensive review and rewrite of the five-year strategic plan.
   Beginning: 02/2016  Completion: 10/2016
4. Review, revise, and implement a hierarchical structure, standing committee structure, and
   assignment of responsibilities. Design a flow chart to depict hierarchy and areas of responsibility.
   Beginning: 02/2014  Completion: 06/2014
5. Revise and implement a detailed fundraising plan.
   Beginning: 10/2012  Completion: 04/2013
6. Recruit at least one new Board member annually.
   Beginning: 01/2012  Completion: Annually
7. Provide for training and certification in a relevant area of at least one Board member annually.
   Beginning: 01/2012  Completion: Annually
8. Send at least four staff and/or Board members to at least one watershed association convention.
   Beginning: 09/2012  Completion: Annually
9. Institute an Program Director position.
   Beginning: 05/2012  Completion: Ongoing
10. Increase Executive Director's hourly commitment from 20 hours per week to at least 32 hours per
    week.
    Beginning: 01/2013  Completion: Ongoing
11. Add a second staff member with ability to handle clerical duties and special event planning.
    Beginning: 01/2009  Completion: Ongoing
12. Institute health insurance policy.
    Beginning 06/2012  Completion: Ongoing

§ Expand and Retain Membership

During the next five years, SMRWA’s membership dues will continue to offer the most stable source for
the Association's unrestricted finances, so prudent use and expansion of potential members will be essential.
Similarly, retaining current members is very important because it is more cost effective than recruiting new
members; and these members will continue to provide the best sources for recruiting volunteers.

Objectives with Assessment Metrics

1. Increase total membership by at least twenty-five regular and four corporate members annually
   with the goal of 565 regular memberships and 70 corporate members—in good standing—by the
   end of 2016.
   - Continue to solicit memberships person to person at events and meetings reaching outside the
     watershed when deemed appropriate.
   - Seek new opportunities to set up organizational displays with brochures and membership
     information.
   - Every two years conduct a targeted social media campaign in order to reach at least 1000 new
     potential members.
   - Present at forums and community group gatherings; invite participants to join SMRWA.
   - Expand opportunities for volunteer implementation projects and recruitment.
2. Retain members through effective organizational operations, meaningful commitment to the
   mission, informative communications with members and the public, and genuine recognition of
   the importance of our members.
   - Upon non-renewal at second attempt, send a renewal form with a checklist for the expired
     member to check off why they are not renewing. Include a convincing letter offering an
     incentive to renew.
3. Refine and implement a plan to solicit donations from members several times each year.
Critical Input Milestones

1. Increase total membership from 440 regular and 50 corporate to 465 regular and 54 corporate.
   Beginning: 01/2012  Completion: 12/2012

2. Increase total membership to 490 regular and 58 corporate.
   Beginning: 01/2013  Completion: 12/2013

3. Increase total membership to 515 regular and 62 corporate.
   Beginning: 01/2014  Completion: 12/2014

4. Increase total membership to 540 regular and 66 corporate.
   Beginning: 01/2015  Completion: 12/2015

5. Increase total membership to 565 regular and 70 corporate.
   Beginning: 01/2016  Completion: 12/2016

6. Table and solicit memberships at events and meetings.
   Beginning: 01/2012  Completion: Ongoing

7. Utilize the tabletop display at least two times per year at varying venues such as museums, libraries, and retail outlets.
   Beginning: 11/2012  Completion: Annual

8. Solicit memberships through a targeted direct mail campaign to reach out to no less than 1000 new addresses every two years.
   Beginning: 02/2013  Completion: Ongoing

9. Continually seek opportunities to present at forums and community group gatherings; motivate Board members to attend; and schedule at least two each year.
   Beginning: 01/2012  Completion: Annually

10. Coordinate and execute an effective process for successful membership retention, meeting a goal of 90% renewal each year.
    Beginning: 09/2013  Completion: Annually

11. Solicit additional donations from members according to fundraising plan.
    Beginning: 01/2012  Completion: Ongoing

§

Enhance fundraising programs

Current programming for fundraisers provides substantial revenues for general operations, but still does not meet the needs of future organizational expansion. RiverFest is a wonderful success in programming and outreach but does not achieve anywhere near its potential. Further refinement of sponsorship solicitation and more involvement by the Board is essential. The spring River Affair was a huge success in its first two years, 2011 & 2012, and shall become an annual fundraiser event. Still its potential has not yet been achieved. A third annual fundraiser could fulfill addition revenue needs and should be a part of a revised Fundraising Plan.

Objectives with Assessment Metrics

1. Increase the revenue from RiverFest sponsors to $23,500 each year.
2. Increase the net revenues from the River Affair to $33,500 each year.
3. Add a third annual fundraiser.

Critical Input Milestones

1. Increase revenues from RiverFest sponsors by $2,500 each year. (from $11,000 in 2011)
   Beginning: 2012  Goal: $13,500
   Beginning: 2013  Goal: $16,000
   Beginning: 2014  Goal: $18,500
   Beginning: 2015  Goal: $21,000
   Beginning: 2016  Goal: $23,500

2. Increase net revenues from River Affair by $3,500 each year. (from $16,000 in 2011)
   Beginning: 2012  Goal: $19,500
   Beginning: 2013  Goal: $23,000
   Beginning: 2014  Goal: $26,500
   Beginning: 2015  Goal: $30,000
   Beginning: 2016  Goal: $33,500
§ Refine and Add New Relationships with Foundations and Corporate Sponsors

Foundation grants and partnerships will continue to be essential for funding SMRWA’s programs, special events, and publications. Likewise, corporate grants, sponsorships, and donations are an important funding source for special events and publications.

Attention to the development of SMRWA's relationship with these potential-funding sources during the past five years has been critically important to its success so far. The Association has adopted clearly defined steps in its approach and development of each relationship and has used detailed note taking and preparation of a file for each potential-funding source as methods for increasing its success in obtaining financial support.

SMRWA recognizes that many of these funders are concerned with how the activities they support will affect their images, and we will continue to tailor our grant requests and other fund-raising campaigns so we can communicate effectively how their grants, sponsorship, or donations to SMRWA will benefit them or help to achieve their own goals.

Objectives with Assessment Metrics

1. Continue to develop and nurture relationships with current trust, foundation, government, and corporate funding sources.
   - Continue an ongoing interaction each year with effective one-on-one (two-on-one) encounters.
   - Utilize targeted campaigns to solicit funding for special events and programs.
   - Develop a database documenting the relationship by reporting to the designated staff person the details of each and every contact.
   - Recruit one or more Board members who are effective and experience in fundraising; until this Board member can be recruited, pursue opportunities to train Board members and staff.

2. Design a detailed fundraising agreement for each program or special event with specifics on benefits to the respective grantor.

Critical Input Milestones

1. Seek one-on-one (two-on-one) encounters with current grantees with the intent of improving communications and developing consensus on program goals and deliverables.
   - Beginning: 01/2012  Completion: Ongoing

2. Identify at least two foundations or corporations and seek one-on-one (two-on-one) encounters with the intent of securing funding in areas of mutual interest. (Always keeping operating expenses in mind.)
   - Beginning: 01/2012  Completion: Annual

3. Engage more Board members to identify potential sources and solicit sponsorship monies and in-kind services for RiverFest.
   - Beginning: 01/2012  Completion: Ongoing

4. Identify revenues areas and donors for increasing net revenues from the annual River Affair.
   - Beginning: 01/2012  Completion: Ongoing

5. Identify other programs and special events where funding is needed or fundraising can be successful and develop a campaign to maximize fundraising effectiveness.
   - Beginning: 02/2013  Completion: Ongoing

6. Incorporate a process where interactions with funding sources or potential funding sources are documented and retained in files as a resource.
   - Beginning: (underway)  Completion: Ongoing

7. Board and staff development (recruitment and training): see page 8.
